

Senior Agile Delivery Manager

31.05.23

£60k to £75k

WFH or Hybrid (Our offices in Fitzrovia or client site)

About the role

Do you feel at home spearheading the delivery of digital products and services that are utilised by members of the public and Public Sector organisations?

If you picture yourself taking the lead and delivering multiple work streams aiming to digitise new and existing products for Public Sector clients, including the NHS, then you could be Olive Jar's first permanent client facing, Senior Agile Delivery Manager.

As the first permanent Delivery hire you will also be key in developing our Delivery & Product Communities of Practice and Ways of Working, whilst collaborating with internal stakeholders, such as our Founders [Olivia](#) & [Rajesh](#), and external stakeholders within the NHS and other Public Sector clients.

What you'll be doing

- You'll be comfortable working in agile environments, facilitating the delivery of projects, throughout the full product lifecycle. Requiring you to run standups, retros, planning sprints whilst also, helping teams understand the role of discovery, prototyping and testing in good iterative design
- You'll ensure teams have the right blend of skills to deliver outcomes aligned to Statements of Work, on time whilst communicating progress and risks to internal & external stakeholders
- You'll need to foster relationships with clients & stakeholders at all levels to ensure successful handover of products & services
- You'll support OJ internally to build out our delivery manager capability
- You'll partner with our Public Sector team to build a narrative & case studies to support future bids

About you

- You'll have demonstrable Delivery Management experience within the consultancy and Public Sector space, leading multidisciplinary project and product teams across the entirety of the project lifecycle (Discovery, Alpha, Beta, Live)

- You can display knowledge of GDS Principles/NHS Digital Standards and assessments, being able to navigate and champion accessibility within product development
- You'll be capable of managing multiple work streams with the ability to context switch between various projects & responsibilities whilst partnering with stakeholders at all levels to generate buy in
- You can showcase creative and critical thinking and the ability to identify and manage risks effectively
- You have previously developed an internal community within Delivery & Product, as well as coached, mentored and upskilled more junior members of the discipline

Whilst the above experience is important, we are also open to developing all staff members through PDPs and coaching, so please still apply if you don't meet all of the criteria.

Benefits

- 25 Days holiday (plus Bank Holidays as standard)
- Access to our Employee Assistance Programme
- Pension Scheme
- Staff Team Building Days and Social Events
- Personal Development Programme
- Annual Salary Review
- Hybrid Working - work from wherever in the UK OR our offices situated in Fitzrovia, London, and from client site as necessary
- Enhanced Benefits Available for Long-Service

Diversity & Inclusion

We don't mind who you are, where you're from, where you've studied or how you identify.

We want you to be able to bring your full self to work - Diversity, Equity & Inclusion are key themes here at Olive Jar.

About Us

As we grow, we empower our teams to develop their roles and functions and offer support to get you from where you are now, to where you want to be.

This has enabled us to become recognised as the 'UK's fastest growing digital consultancy of the year 2021'. Moving towards our 9th year, we are now an established brand, championing managed digital delivery services and the provision of expert talent to enhance customer and in-house teams, satisfying all user needs.

We are a professional, fun, fully Inclusive and diverse digital agency, valuing everyone's opinion. Our team is small in quantity but with a huge growth plan over the next two years we are looking to expand our client facing delivery team with designers, developers, and testers as we continue to expand our project portfolio.
